

Rescue teams

Under the 2009 amendment to the confined spaces regulations 1997, rescue provision should be made that does not solely rely upon the public emergency services. This is where UTS can assist you. We can provide:

- On site rescue teams
- Rescue plans
- Risk assessment for confined spaces
- CDM management
- Minor M & E works in hostile atmosphere
- Surveys of hostile atmospheres
- Confined spaces project management
- First aid provision
